FOR IMMEDIATE RELEASE

Powerline Control Systems Announces PulseWorx™ Certified Training Schedule

Dealers and Integrators now have two locations to learn about the PulseWorx product line as well as what benefits UPB Technology can bring to their bottom line.

Orlando, FL (March 6, 2007) – PCS (Powerline Control Systems, Inc.) the inventor of the ultra-reliable UPB Technology, is announcing that PulseWorx™ 101 and 102 Certification Courses have been scheduled each month at it's Headquarters in Northridge, CA and in Dallas, TX.

Each month Dealers will get a full day "hands-on" interactive education of the UPB Technology, existing technology partners as well as the complete inter-operational methodology of the PulseWorx™ product line and how easily the devices can be installed in RETROFIT AND NEW INSTALLATIONS, ensuring ultra-reliability from the start.

Utilizing existing Keypad Controllers and UPStart Software, students will learn the power of this ultra-reliable technology and the flexibility of programming lighting scenes and timed events.

"With so many new technologies coming into the marketplace, we feel that education of UPB and PulseWorx™ is the back bone to a successful future for our existing and future customers." said Scott Klodowski, Director of Sales and Marketing, " We are planning on expanding the locations and frequency as we partner with new Distributors this year."

Scheduled Dates:

March 14th, April 18th, May 16th, June 13th, July 18th, Aug 15th, September 12th, October 17th, November 14th, December 12th.

PCS's PulseWorx™ product line is sold thru Authorized Distributors and Dealer/Integrators. Email support@pcslighting.com, call 888.701.9831 or visit www.pcslighting.com for further information on how to attend and locations.

About PCS (Powerline Control Systems, Inc.)

Powerline Control Systems (www.pcslighting.com) has been developing and manufacturing top-of-the-line lighting and electrical control devices for the residential and commercial markets since 1992. PCS provides a complete range of products under the PulseWorx™ brand, such as keypads, home controllers, dimmers, switches and custom-designed electrical control devices; powered by the UPB (Universal Powerline Bus) patented technology, the latest innovation from the PCS design team. UPB is answering the call for a lower cost, high reliability lighting control system to provide an alternative to expensive proprietary and hardwired systems.

PulseWorx™ devices work with existing powerlines in the home, making them perfect for existing home retrofit and remodel situations, as well as new construction. PCS has received numerous awards from both industry organizations and the media, including, Product of the Year and CEPro magazine's Top 50 Editor's Pick.
