PCS announces Superna has become a PulseWorx Partner

Northridge, CA (May 7, 2007) – PCS (Powerline Control Systems, Inc.), the inventor and leading developer of the ultra-reliable two-way UPB technology, announced today that Superna, Inc, has become a PulseWorx Partner. Confignet a complete suite of home automation solution software is now fully compatible with PulseWorx™ UPB lighting control system.

PulseWorx is a highly flexible and scalable control system designed for use in any home. It runs on PCS' ultra-reliable patented UPB (Universal Powerline Bus) technology. UPB is answering the call for a lower cost control system that provides an alternative to expensive proprietary and hardwired control systems, which makes them perfect for existing home retrofit and remodel situations, as well as new construction.

"It looks like a bright future, Superna has been pushing the envelope on automation and this partnership will provide an elegant TV interface option for both integrators and homeowners to quickly and affordably have a UPB lighting solution without running wires" says Scott Klodowski, Director of Sales and Marketing, Powerline Control Systems.

Superna is the first company to fully leverage standard ethernet networks to provide home control, whole-house digital media distribution and home automation.

"A long established lighting control system, PulseWorx™ UPB is in high demand by our integration community. We are proud to be partnered with one of the leaders in lighting control" says Avi Rosenthal, VP of Sales and Marketing.

The PulseWorx product line is sold through a network of dealers and distributors. It is comprised of dimmer switches, keypads, plug-in modules, home controllers, and interface devices, all backed with an industry leading Money-Back Guarantee.
