

FOR IMMEDIATE RELEASE

PCS announces Savant Systems has become a PulseWorx Partner

Northridge, CA (May 13, 2010) – PCS (Powerline Control Systems, Inc.), the inventor and leading developer of the ultra-reliable two-way UPB® technology, announced today that Savant Systems, LLC, has become a PulseWorx Partner.

Savant Systems LLC, having delivered the first Apple®-based home automation and control system, will be now including full interoperability profiles to all PulseWorx Lighting Control devices with their RacePoint Blueprint™ design software.

PulseWorx is a highly flexible and scalable control system designed for use in any home. It runs on PCS' ultra-reliable patented UPB (Universal Powerline Bus) technology. UPB is answering the call for a lower cost control system that provides an alternative to expensive proprietary and hardwired control systems, which makes them perfect for existing home retrofit and remodel situations, as well as new construction.

"It looks like a bright future, Savant Systems has been pushing the envelope on automation and this partnership will provide an elegant Apple interface option for both integrators and homeowners," says Scott Klodowski, Director of Sales and Marketing, Powerline Control Systems.

Savant luxury home theater and home automation solutions are engineered to simplify life – not complicate it. Featuring the industry's only Apple®-based control and automation solution, Savant unifies all of your whole house audio and video, lighting control systems, security, climate, communications, internet and ancillary services into one easy-to-use, seamless experience. The core of Savant's technology is an open programmable platform supporting UDP/IP, TCP/IP, RS-232/422/485 and IR serial communication, and Low Voltage Trigger Outputs.

"PCS is a great fit for any installation including retrofits or circumstances when it is difficult or impossible to pull new wires for a controlled lighting system," stated Bob Ross, Savant's Director of Business Development. "PCS is a viable lower cost alternative lighting technology that our authorized dealers will now be able to integrate with in the field," Ross said.

The PulseWorx product line is sold through a network of distributors, certified integrators and authorized dealers. The PulseWorx Partner program is for participating manufacturers seeking to expand their offering by interfacing their products with UPB Technology and business in a rapidly growing industry. For further information about the PulseWorx Partner program, interested manufacturers should, visit http://www.pulseworx.com/upb/supported_.htm, or call 888.701.9831.

About PCS (Powerline Control Systems, Inc.): Powerline Control Systems has been developing, manufacturing top-of-the-line lighting, and electrical control devices for the residential and commercial markets since 1992. PCS provides a complete range of products under the PulseWorx® brand, such as touchscreens, keypads, home controllers, dimmers, switches and a variety of other electrical control devices; powered by the UPB® (Universal Powerline Bus) patented technology, the innovation of the PCS design team. UPB is answering the call for a lower cost, high reliability lighting control system to provide an alternative to expensive proprietary and hardwired systems.

PulseWorx devices use the existing powerlines in the home, making them perfect for existing home retrofit and remodel situations, as well as new construction. PCS has licensed its technology to other companies and received numerous awards from both industry organizations and the media, including Product of the Year, CEPro magazine's Top 50 Editor's Pick and MRA's Best No-New-Wires Technology.

About Savant: Savant was founded by a core group of technology pioneers with hundreds of years of combined real-world experience in peripheral applications such as programmable systems, digital signal processing, telephony, switching systems, video processing, and home electronics integration. The Savant Team is committed to redefining the Home Control Systems industry with a visionary solution to home automation that emphasizes reliability and a maintenance-friendly open platform. The Savant product suite is distinguished by an unparalleled blend of cutting-edge technology and advanced next-generation graphics.

UPB and PulseWorx are registered trademarks of Powerline Control Systems, Inc., Northridge, California. All other trademarks are property of their respective owners.
